

Open invitation.

**Welcome to the 2011 PLCS/AP233 Implementation Experience Workshop!
September 19, 2011, Universities of Vaasa, Finland**

Eurostep, LOGSA and DNV have the pleasure to invite to an open forum about PLCS/AP233 Implementations. There is a huge need to move the PLCS/AP233 experience outside of the standards communities and support commercial projects with the benefits that can be achieved by implementing these standards. This is something we all need to put effort into in order for all in the Product Data Community to harvest from the excellent work performed over the past 10 years. The standards are important to MODs and their suppliers. But we see increase in the interest for implementations from many industries outside aerospace and defence. ***Simply because the standards make sense!***

The purpose of the workshop is to share experience from implementations, conclude on findings and suggest future work.

We expect this to be a significant event in sharing and consolidation experience and move PLCS/AP233 towards additional high quality take up and use. Workshop leaders are Eurostep, LOGSA and DNV.

The workshop is open to all and as last year we have the request that people attending have experience to share with all and are committing to do a 10-15 minutes presentation about a case. We encourage all with experience from PLCS/AP233 implementations to submit a short abstract to the organizers to allow for proper planning. The organizers will based on abstracts received plan the agenda.

Please send email with your abstract to hakan.karden@eurostep.com

Preliminary agenda:

10.00-10.30 Welcome and introduction

10.30 – 14.30 Case presentations by participants incl project scope, work performed, result and recommendations. Lunch around 12.

14.30 – 15.00 Break

15.00 – 17.00 Review of cases, conclusions and recommendations.

17.00 end

Participation is at no cost, participants pay for meals.

For information about the workshop please contact:

hakan.karden@eurostep.com

nigel.shaw@eurostep.com

trine.hansen@dnv.com

scot.motquin@us.army.mil

Space is limited since we seek a real workshop event (around 25 participants) so we encourage you to submit your abstract early!

See you in Vaasa,
Eurostep, LOGSA and DNV
